Lesson Plan 6: Creating an Intro

Objective

Create and introduction to your song using existing material

Procedures

1. Highlight and drag your whole song to create space for an intro. Many intros are 4 or 8 measures long, but yours can be any length.

2. Copy and paste some of the song material into your intro.

3. Play your song and see how your intro sounds as it builds into the verse. Adjust your intro as you see fit.

Questions

1. How did you decide what instruments to include or exclude from your intro?

2. How does adding an intro change the overall feel of your song?

3. What other steps could you take to change your intro?
