

# Handout: Junk Drumset Part 2 - Building the Kit

## Objective

Build a junk drumset using household materials

## Procedures

- 1) Build a junk drumset using a variety of household materials
- 2) On an acoustic drum set, the drums are typically wood cylinders with a plastic “head” on the top. At home, great drums could be:  
Plastic containers  
Buckets  
Magazines
- 3) Cymbals are made of metal. At home, cymbals could be:  
Cans (watch for sharp edges!)  
Jar lids

## Questions

What did you use to build your drumset?

Which of your “junk” instruments has the lowest sound?  
How about the highest sound?

What is your favorite sound in your drumset? Why?
